

IVE Wireless Screen Sharing from Mobile Devices to Desktop PC and Projector

To start wireless screen sharing of your devices, please double click the shortcut of the required application **AirServer** at the desktop of the PC. Then, if you may see the dialogue box "Potential Firewall Issue Detected", please choose the option → **I have already configured ... for AirServer**

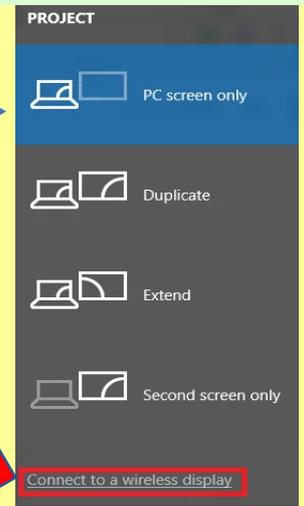

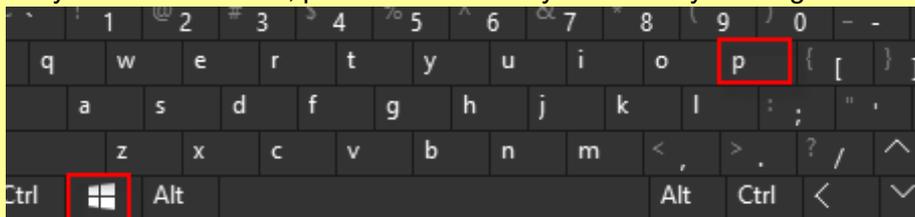

(A) Apple or Android mobile devices

- For Apple device, you are required to firstly join the **VTC-Staff** network through Wi-Fi for the teacher's PC and your device
- On your iPad or iPhone, swipe the screen to access the Control Center and tap the **Screen Mirroring** icon
 - On your MacBook, click the **AirPlay** icon at the menu bar 
 - On your Android device (such as Samsung tablet/phone), swipe the screen to access the Quick Settings panel and tap the **Smart View** icon 
- Choose the name of the desktop PC (called **ST-LRC-MM-MMxx**) from the available devices

(B) Window-based mobile devices (Win10 or above)

- On your mobile device, make sure Wi-Fi is turned on 
- On your mobile device, press **Windows** key with 'P' key to bring out **PROJECT** menu

- At the PROJECT menu, click to select the option **Connect to a wireless display** 
- Choose the name of the desktop PC (called **ST-LRC-MM-MMxx**) from the available devices

Note: Mobile devices such as notebooks or tablets are available for staff use in hybrid teaching. Kindly come to the service counter of the LRC Complex (ground floor) to borrow them if required please.

For any question, please contact LRC during office hours at tel.: 22567 640/ 641/ 642/ 644/ 645
